

# Health Care

## "Automate your Experience"

### INDUSTRY

As the health care industry is growing with the day to day increase in the number of patients, the industry faces a huge challenge in managing the patient records, appointment schedule, financial billing process, integration with insurance providers and the inventory management.

### CHALLENGE

Maintaining the patient records and converting the records to a digital format is always a challenge in the health care.

Maintaining customer experience in terms of scheduling appointment and managing the internal workforce and schedule proves to be a highly challenging task

Execution of the patient billing on a timely manner and reconciliation of the same in finance is a cumbersome process in the health care industry due to the volume of transactions.

Inventory management of the day to day operational items is one of the key challenges and if not properly managed it will result in significant financial loss to the organization.

### SOLUTION

Robotic process automation (RPA) from Atominos Consulting focusing of the Health care industry can benefit the organization in automating most of key challenges such as Patient file management, Billing Process, Inventory Management and Appointment management.
